Important information regarding analysis of allergenic materials. It should be noted that the results obtained do not take the following into account:-

- 1) Variations in treatments of foodstuffs during processing.
- 2) Variations in responses given by proteins derived from different source materials.

It should be noted that:-

Where a result is declared as below the limit of detection (LOD), this does not imply the absence of allergenic material, only that there is no allergenic material detectable by the method.

There may be allergenic material present which is below the limit of detection (LOD) of the method or the allergenic material may not be detected by the method.
